EXPERIENCE

Event Staff || The Waiting Game
June 2019 – Present || Bristol, UK
- Worked in numerous different roles including bar staff, waiting staff, and front of the house. I am incredibly flexible and willing to learn, preforming any tasks that I am assigned.

Intern || Vision Profile Extrusions
August 2018 – September 2018 || Woodbridge, ON, Canada
- Successfully completed various projects for the controller and operations analyst including sales tax reconciliation and the compilation of month end documents.
- Quickly learned to operate the Syspro ERP Accounting/ Manufacturing Software to a proficient level with little previous experience, utilising the software to undertake review of sales margins on new products.

VOLUNTEER EXPERIENCE

Course Representative || University of Bristol
October 2019 – Present || Bristol, UK
- Elected to represent the MSc Computer Science cohort.
- Successfully campaigned for alternate assignment requirements and extended deadlines during COVID-19.

Legal Advisor || University of Bristol Law Clinic
September 2018 – June 2019 || Bristol, UK
- Responsible for providing free legal advice to clients, taking meeting minutes, conducting research, writing letters of advice, and preparing documents for court.

Project Volunteer and Brand Ambassador || Think Pacific
June 2018 – July 2018 || Bavu Village, Fiji
- Undertook a 5-week volunteer trip to Fiji to improve student performance in remote schools by creating lesson plans for teachers and establishing a sporting program.
- Subsequently selected as an ambassador to promote Think Pacific on campus due to my performance and attitude on the trip.

PROJECTS

Automatic Summarisation of UKHL Judgments || MSc Thesis
December 2019 – Present || University of Bristol
- Developing an automatic summarisation system by using supervised machine learning to create clear summaries of UKHL judgments for the average individual.

Do or Die Fitness Tracker || Course Project
February 2020 – May 2020 || University of Bristol
- Lead the development of a fitness tracker for a software engineering module.
- Includes a M5Stack, website and management dashboard that communicate in real time using MQTT.
